

RNO-G Station Map

Notes:

- Station numbering follows a grid, where the first numeral is in increasing W-E and the second numeral is in increasing S-N, skipping non-existent stations (the Seckel method).
- Station spacing is 1.25 km in map coordinates (but really 1.23 km due to projection, which creates a 2% scale difference.). Planned station locations are shown, actual locations may vary slightly.
- Projection is UTM Zone 24N (EPSG:32624). True north indicated by Rose, offset from grid north by 0.6°.
- Magnetic Declination, for April 1 2024, is -24.4° according to the WMM.
- In list below, all future stations labeled as 2025.

v 0.6.1
